Vardhan Mittal

+91-9346676395 | logicalmittal@gmail.com | LeetCode | CodeChef | GitHub | LinkedIn | Portfolio

Education

National Institute of Technology Delhi — New Delhi, India
B.Tech in Electronics and Communication Engineering, Minor in Machine Learning — *May 2023 – May 2027*
- CGPA: 9.56/10

Experience

Zscaler — May 2026 – July 2026
SDE Intern | Python, PyTorch, LoRA/QLoRA, Hugging Face PEFT — *Bangalore, India*
- Fine-tuned Small Language Models using LoRA / QLoRA with PyTorch and Hugging Face PEFT to work as a log analyzer, taking client bug logs as input and producing root-cause analysis with suggested resolution steps.
- Prepared and structured the training data from raw log files, and compared parameter-efficient tuning configurations to evaluate the quality of the generated analyses.

National Institute of Technology Delhi — Jan. 2025 – Apr. 2025
Research Assistant | Python, SVR, Random Forest, XGBoost — *New Delhi, India*
- Applied SVR, Random Forest, and XGBoost to optimize solar cell efficiency predictions, improving model accuracy by 23.95%
- Led the research project to publication, demonstrating a 25% improvement in predictive performance for energy output forecasting

Projects

AI Interview Coach | *Next.js, TypeScript, Go (Gin), PostgreSQL, OpenAI/Gemini API* — Live Demo
- Built a full-stack platform that parses a resume with AI and conducts an adaptive mock interview of 25 personalized questions weighted by the candidate's skills and projects
- Designed a Go (Gin) backend serving a Next.js frontend, delivering topic-wise scoring and an AI-generated study roadmap targeting the candidate's weakest areas

DevTrack – Developer Command Center | *Next.js 16, PostgreSQL, Prisma, Tailwind, NextAuth* — Live Demo
- Engineered a full-stack developer productivity dashboard syncing real-time algorithmic stats via LeetCode GraphQL and Codeforces REST APIs
- Integrated an AI pattern engine to instantly generate production-ready project architectures, tech stacks, and database schemas from natural language

WanderWise – AI-Powered Travel Companion | *React Native, JavaScript, Expo, Firebase, Gemini AI*
- Built a cross-platform travel planner using React Native and Gemini AI, delivering smart itinerary suggestions and real-time tracking, improving planning efficiency by 45%
- Empowered students to plan budget-friendly research trips and explore destinations with AI-driven insights via an intuitive mobile app

Achievements

Achieved **Expert (1628)** rating on Codeforces | **3-Star** rated on CodeChef | Solved **500+** problems on LeetCode and GeeksforGeeks
Selected for **Amazon ML Summer School 2026** among **85,000+** participants | **NTSE Scholar**
Semi-finalist among **150,000+** teams in Flipkart GRID 6.0 Hackathon | **Finalist** among **47,000+** participants in HackVega 2.0
Secured **4th position** among **1,000+** participants in the NxtWave DSA Coding Competition

Technical Skills

Languages: C++, C, Python, Java, JavaScript, Go, SQL
Frameworks: React.js, Next.js, Node.js, Express.js, Flask, Tailwind CSS
AI/ML: PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, LoRA/QLoRA, Pandas, NumPy
Databases & Tools: PostgreSQL, MySQL, Firebase, Git, GitHub, VS Code, Android Studio, Linux
Coursework: DSA, OOP, DBMS, Computer Networks, Machine Learning

Position of Responsibility

Member, Technical Club, NIT Delhi – Web Development Wing
Head of Calling Team, Training and Placement Cell, NIT Delhi – Coordinated recruiter outreach and communication, contributing to smoother placement processes
